SKILLS

- **Languages:** C, C++, Java, Python, SQL, JavaScript
- **Frameworks & Libraries:** Django, Django REST Framework, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, React.js
- **Core Concepts:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems
- **Tools/Platforms:** Tableau, Excel, Power BI, Git, GitHub, Docker, Jenkins, REST APIs, Data Analysis, Data Visualization
- **Soft Skills:** Problem-Solving, Team Player, Adaptability

PROJECTS

Smart Food Waste Reduction & Meal Optimization System | [GitHub](#)

Mar'26 – May'26

- Developed an AI-powered full-stack platform to optimize meal planning and reduce food wastage using predictive analytics.
- Built a Random Forest-based forecasting model using historical booking data to predict daily meal demand.
- Designed secure REST APIs with Django REST Framework and implemented JWT-based authentication for role-based access control.
- Containerized the application using Docker Compose and configured Nginx for scalable multi-service deployment.

Tech Stack: Python, Django REST Framework, React.js, Scikit-learn, PostgreSQL, Docker

PathVera – AI-Powered Navigation & Assistance Platform | [GitHub](#)

Jan'26 – Mar'26

- Architected a scalable AI-powered navigation platform using Django and Django REST Framework, enabling low-latency real-time query handling via a modular API-driven backend.
- Engineered REST APIs with JSON-based request-response flow to handle real-time user queries efficiently
- Integrated Gemini API to deliver contextual AI chatbot responses for navigation-related assistance
- Implemented an NLP-based recommendation system using embeddings and semantic similarity for intelligent matching

Tech Stack: HTML, CSS, JavaScript, Django, Django REST Framework, Python, Gemini API, NLP, REST APIs

Retail Sales Performance Dashboard – Power BI – Data Visualization | [Live](#)

Nov'25 – Dec'25

- Designed an interactive Power BI dashboard to analyze multi-year retail sales trends and performance metrics
- Processed and modeled ~293K transactions and ~87K customer records to design a scalable data model enabling efficient KPI tracking and faster analytical insights.
- Built data transformation pipelines using Power Query and DAX to generate key business KPIs
- Generated insights on ~410M+ revenue, identifying key growth patterns and enabling data-driven business decisions

Tech Stack: Power BI, Power Query, DAX, Data Modeling, Data Visualization, Excel

TRAINING

Centre for Professional Enhancement (Lovely Professional University) | [Link](#)

Jun'25 – Jul'25

Summer Training

- Engineered a car price prediction model using Random Forest regression to estimate vehicle resale values
- Achieved ~93% R^2 score through hyperparameter tuning and model optimization techniques
- Applied feature engineering and preprocessing techniques to improve model performance and generalization
- Deployed the model as an interactive Streamlit application for real-time price prediction
- Utilized Python, Pandas, Scikit-learn, and Streamlit to build an end-to-end machine learning pipeline

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Random Forest Regression, EDA, Streamlit

CERTIFICATES

- Programming for Data Science by [Coursera](#) Dec'25
- ChatGPT Made Easy: AI Essentials for Beginners by [Udemy](#) Aug'25
- Completed Cloud Computing Course by [NPTEL](#) Apr'25
- Responsive Web Design by [FreeCodeCamp](#) Nov'23

ACHIEVEMENT

- **LeetCode:** 200+ Problems Solved | [Link](#)
- **Code360:** 175+ Problems Solved | [Link](#)
- **GeeksforGeeks:** 75+ Problems Solved | [Link](#)

EDUCATION

- **Lovely Professional University**
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.43**

Punjab, India
Aug'23 - Present

- **Mahant Bhagwat Vishal Inter College**
Intermediate; **Percentage: 67.66**

Kadavra, Uttar Pradesh
Apr'20 – Mar'22

- **Dr B R Ambedkar High School**
Matriculation; **Percentage: 79.59**

Kadavra, Uttar Pradesh
Apr'18 – Mar'20
